CHICAGOLAND'S QUALIFIED FIRE, LIFE & PROPERTY SAFETY PARTNER SINCE 1977.

Fire Alarm & Detection Systems

Contech The Fire Alarm Company, is Chicagoland's leading full service fire alarm contractor specializing in complete installations of fire alarm/voice communication systems, system replacements, Mass Notification system, elevator recall integration, Area of Rescue and VESDA. We are committed to delivering reliable, code-compliant solutions tailored to our client's needs.

Sprinkler Systems, Fire Pumps & Supression Solutions

Our Local 281 fitters are fully trained and qualified to provide the installation, testing, inspection and maintenance of the following systems : Wet Pipe (which includes gauges, system valves, the fire department connection, components & signs), Dry Pipe, Standpipe, Pre-action and Deluge systems, along with Fire Pumps/Fire Pump Controllers.

They follow well-defined, published installation and testing procedures based on the latest National Fire Protection Association (NFPA) and local requirements.

Fire Extinguishers, Supporting Equipment, Inspections & Staff Training

We support clients with fire extinguisher sales, fire extinguisher testing and certification. We also sell and inspect medical aid cabinets and AED's. To help our customers be prepared in case of an emergency, we offer live fire training for facility or property management teams. Get in touch to learn how we support first responders and fire departments with our SCBA Life Extension program, CO2 and SCUBA Tank Testing.

24/7 Emergency Service & Monitoring

We support our clients with 24/7 Emergency Service, just a call away when you need it the most.

Monitoring is the connection between your system and the local dispatch center. An alarm within your facility will not automatically notify authorities in the event of a fire without this connection. As a licensed contractor, Contech The Fire Alarm Company can provide the monitoring solution that is right for you.

Property Safety & Parking Management

Our service capabilities have expanded to protect your property from the perimeter with the scope of protection infrastructure and security technology you require. This includes:

Gate Systems (Slide, Swing, Barrier, Folding), Crash Rated Systems (Bollards, Anti-Terrorist Barricades, Crash Wedges, Crash Beam Barriers, Traffic Spikes), Security Systems (Guard Booths & Shelters, Turnstiles & Speed lanes, Telephone Entry & Access), PARCS System (Parking & Revenue Control, RFID Readers & Tags, Vehicle Guidance & Count, AVI Readers), Service & Preventative Maintenance

Emergency Lighting, Gas Detection Systems, Area of Rescue / Refuge

Contech provides the installation, testing and maintenance of your supporting systems to keep your building safe, including but not limited to emergency and exit lighting, Area of Rescue/Refuge, Gas detection, and other supporting components of your life safety system.

Voice Communication and Mass Communication Systems

At Contech we understand the importance of having an intelligible voice communication & mass notification system for a buildings safety and operational efficiency.

These systems can disseminate critical information instantly through multiple channels such as public address speakers, mobile alerts and digital signage, which will provide real time clear and actionable instructions during an emergency. This will prevent panic and guide occupants to safety.

Inspections

Contech's fully trained IBEW Union affiliated Testing technicians, follow strict NFPA 72 testing guidelines and procedures to ensure that your property & people are safe and your systems are working properly.

Code Compliance

Our leading fire safety experts understand local building codes and life safety requirements. We provide guidance to help keep your property up to date and compliant.
